Student in charge

Probably Worst Road In The Province

Sherman said, "War is hell," but what the average autoist says who travels the Green Trail from Atlee to Idlesleigh would hesitate to endeavor to put into print. That the Alberta government would call this trail a road is a disgrace and it would be hard to beat for the honor or dishonor of the worst road in the province. Elsewhere, west, apparently there is considerable road repairing being done, but not so in this district where it is apparently more urgently needed.

Ferry Crossings Are Heavy

J. E. Graherson, ferry inspector, was a visitor in town over Wednesday night, and made an inspection trip to the south ferry. Crossings for the ferry for the month of July totaled 2,000.

Build a Real Home

We have just in, some of the latest Plan Books on labour-saving conveniences. Call and get one free.

Also carload of Large Stove Coal in, just what you want for the harvest.

Reports Damage By Frost Lowers Grade

Regina, Sask., September 11.—That the severe frost of three weeks ago did serious damage to Saskatchewan wheat crops with resultant lowering of grade, was the statement made this morning by R. J. Moffat, managing director of the Saskatchewan Pool Elevators, Ltd. Regina office. At the time of the frost it was difficult and impractical to estimate the extent of the damage. Reports were of a conflicting nature and the extent of the damage had been over-estimated.

"In so far as the damage done by last month's frost is concerned, we are finding out through samples of threshed wheat received at this office the nature of it. There is a very serious damage," Mr. Moffat declared.

"It will lower the grade. We have samples of wheat which, although they weigh 58 and 60 pounds to the bushel, will now grade No. 3 or feed."

Mr. Moffat said that the samples were a surprise to him, especially since they were not from certain restricted areas. The damage was not confined to any particular section, although it was more severe in some parts than in others. A grain that would otherwise have been awarded a grade of 1 or 2 northern will be graded as 4 or 5 now, Mr. Moffat said. He added that the milling texture of the wheat would also suffer from the frost.

Commenting on the latest crop estimate, released this morning, which estimated Saskatchewan wheat for 1928 at 290,607,934 bushels, Mr. Moffat said: "As far as Saskatchewan is concerned, I think your estimate is a little too high."

Mrs. Benner received a thirty-five bushels wheat return from her summerfallow land, grading No. 2 straight.

Enjoyable Dance Is Held

A very enjoyable dance was held in the theatre on Tuesday evening in honor of Mr. and Mrs. T. S. Wallace and Mr. and Mrs. R. J. McGinnis. These people have made themselves very popular with the community during their residence here, and it was thought only right by their many friends that an appreciation of their fellowship be shown. For this purpose a public dance was arranged. Among those present was a goodly number of friends from Blindfold. Those present spent a happy time.

After the supper interval, Mr. J. Maxwell in jocular vein, voiced the appreciation of the many friends of the honored guests. Their regrets at their departure and their wishes for their future welfare and success. The dance continued merrily along until 2.30 a.m. and was concluded by singing of "God Save the King." Messrs. G. Eldler, piano; Mr. Smith, violin and J. McNeill, saxophone rendered an enjoyable brand of music.

"WHAT PRICE GLORY"

Life—its humor, drama and pathos; this is "What Price Glory." A gripping story of conflict told with startling realism. The stage play by Laurence Stallings and Maxwell Anderson, on which the motion picture version is based, took the nation by storm. It was sincere, vivid, colorful. Raoul Walsh has kept faith with the authors for he has with uncanny skill translated these humans to the screen—not mere puppets, but pulsating men and women who live and breathe, laugh and cry, fight and love—a veritable orchestra of emotions.

"What Price Glory" is the most sincere film of the century. To see it is to become a living part of it!

Angus McKinnon Wins Watch

The gold watch for which tickets were sold in this district, and proceeds of which are for the Catholic Church, was won by Angus McKinnon, of Eyre. The drawing for the winning ticket had been postponed and finally took place at W. Leach's cook eat, on Tuesday, September 11. The winning number was, "No. 286."

Harry Leach is reported to have secured forty-five bushels of wheat from his summerfallow land.

Wheat Pool News Bulletin

The new Alberta Wheat Pool terminal will be taken over by the Alberta Pool Elevators organization some time during the latter part of this month. The new terminal which has a capacity of two and a half million bushels, is the largest and most modern elevator on the coast. There will be no ceremony in connection with the opening of this new structure.

New wheat samples coming in to the Wheat Pool office show a higher quality than last year's wheat. Protein content is ranging considerably higher.

The Alberta Wheat Pool is paying farm storage this year. One cent a bushel will be paid on wheat kept back until December 15, and an additional one cent for wheat delivered after January 15th. Two cents per bushel is the maximum farm storage allowed.

The total handlings for the 160 Alberta wheat Pool Elevators last year was 27,350,000 bushels. This year the Pool has 300 local elevators. To participate in the Pool Elevators excess profits, Pool members must deliver their grain to Pool houses or ship direct to Pool Elevator head office.

Suggestion To Organize A Juvenile Band

A proposal is on foot to endeavor to start a juvenile band. Undoubtedly if such an endeavor could be brought to a successful issue it would be a splendid thing. Besides its instructive and recreative values it would also use time which at present is idly spent by some of the young people. We have no doubt but that parents would give their best support to the organizers of a project of this nature.

A fair quantity of wheat is now coming into the elevators. It is practically all of good grade and color. While the yields are good, the expectations of the farmers for a heavier crop than last year are not being realized. However, good summerfallow crops are yielding as high as thirty-five to forty and more bushels to the acre. It is expected that some of the late grain will be frost-killed.

Wanted

By the Nu-Bone Corset Co. energetic lady to train for Corsetry. Big money made. Full time or part time. Apply, Box 616, Empress, Alta.

Former Local Men Are Doing Well Marketing Refrigerating Product

A letter from Mel. Blodgett at Detroit, Mich. tells us of the success which is being attained by the Universal Cooler Co. "Geoff" Johnson is vice-president of the Company, and Mr. Blodgett also holds a good position with them. Mel. reports his wife and family as in the best of health and going along fine. A clipping enclosed in the letter gives a few particulars in regard to the Company's activities: "Detroit is the home of a company manufacturing electric refrigerators which is making an outstanding record for itself.

Although not the largest in the business, the Universal Cooler Corporation is one of the fastest growing electric refrigerator companies. It is meeting with great success in the commercial field by following the same policy which its affiliated Canadian company has followed.

By developing the commercial business first, the Canadian company was able to sell more commercial ice cream cabinets in its first year of operation than any other competitive manufacturer. It is stated.

Sales of the American company for July were more than \$80,000, compared with \$21,000 in July, 1927. Orders for Aug.

just exceed \$100,000. Earnings for 1928 based on the business to date are running 20 per cent ahead of last year.

By developing the commercial business first the company has succeeded; in flattening out the seasonal trends which has been the bane of the electric refrigeration business as the sale and servicing of refrigerators in the commercial field is practically a year round affair.

One of the policies adopted by the Universal Cooler Corporation is the plan of selling ice cream cabinets to ice cream manufacturers, who in turn rent them out to druggists and confectioners. This has been very successful.

The company also is developing a large business in commercial water cooling systems for factory industrial uses, and hotels. This business and multiple installations for apartment houses are important factors in building up quantity business.

Officers and directors of the company follow:
President: C. C. Dunham; vice-president and general manager, G. M. Johnston; secretary, A. H. Meinke; treasurer, U. B. Tuttle; directors, B. S. Evans, A. M. Sarver and Ford Ballantyne.

H. J. Duff left for Hanna on Monday.

'WHAT PRICE
GLORY'

WITH

DOLORES DEL RIO

Victor McLagan and Edmund Lowe
and a Superb Cast

"What Price Glory" is the most sincere film of the century. To see it is to become a living part of it.

London is Vulnerable To Air Attacks As Proven By Mock Bombing Raids

London.—The annual manoeuvres of the Royal Air Force ended Saturday morning. In these manoeuvres "enemy" bombers made 57 day-night raids on London, in nine of which they completely evaded the defence and dropped threatened messengers of supposed death and destruction.

Brigadier-General Groves, former director of flying operations and now secretary of the Air League, said: "London is too big to be adequately defended from an air attack. In a short time its vital points would be in ruins and all other sections of the city would be rendered uninhabitable because of gas."

One of the facts of the manoeuvres is that theoretically 300 tons of bombs loaded with incendiary explosives were dropped on London within one week.

General Groves is certain that in the event of war, civilian population would suffer most.

"High explosives and gas bombs will be used freely in the next 'starvation' raid," he said. "It will be the aim of each side to terrorize the civilian population of the other. London is peculiarly vulnerable to an air attack."

It was brought out that a fleet of enemy bombers could be over London in 15 or 20 minutes after crossing the coast line. They could reach their objective so quickly that unless they were intercepted at the coast they would drop their entire cargo of explosives on the city before defending aeroplane squadrons could leave their aerodromes and gain attacking altitudes. It was calculated that the battle area of such an engagement would be 200 miles square and four miles deep.

A further point was that if the attacking planes were caught and destroyed while they were over London the enemy cargoes still would fall on the city and terrible damage would result.

Some of the London newspapers quote French newspapers as being surprised at "official British candor in making this confession of defeat."

These papers point out that France leads the world in air strength, that, including reserves, it has more military planes than all other powers put together. They say, too, that Germany dominates commercial aviation, which would be the source of many bombing aeroplanes in case of war.

Montreal Garment Workers Quit
Montreal.—Twelve hundred employees and 70 work shops in Montreal are affected by the present "stoppage" of work of local members of the Amalgamated Clothing Workers of America. It is not spoken of as a strike by union officials because not all the shops of the city are affected. Speedy termination of their dispute is expected.

Church Is Desecrated
St. Jerome, Que.—Vandals entered the Roman Catholic Church here and laid waste many sacred altars. Sacred vessels were thrown around the chalice and the main body of the church, while the priests' vestments were torn and slashed and scattered around the edifice. A chalice containing the Host was broken to pieces.

Heavy Toll Of Life Taken As Natives Of North Succumb To Flu Epidemic

Edmonton.—Securing the population along the banks of the Mackenzie River, the influenza epidemic which has been raging in the North for some time has taken a toll of 270 of the native population within a period of a couple of weeks, according to a report received in Edmonton.

As far as is known only one white man has succumbed to the disease. A total of 63 are now known to have succumbed at Fort Simpson alone, according to a radio message received by Jack Stewart, a trapper at that post. The message was sent by a man named Sherwin.

The full total of the deaths caused by the disease may not be known for months until police parties and trappers returning to the line among the hills and barren land find

Fatal Crossing Accident

Three Killed and One Badly Injured At Grade Crossing In Alberta
Calgary.—Three were killed, one fatally hurt, subsequently succumbing in hospital and one other dangerously injured in a crossing accident at the town of Okotoks.

The dead are A. J. Clarke, deputy sheriff of the town of Sunburst, Montana, his wife Jennie, and his two boys, Garry aged ten, and Lloyd aged four.

A daughter, Ada, aged about 15, lies in hospital in high regard in a precarious condition.

The party were touring on holidays and had been staying at Courts, Alta. They left there with the intention of driving to Calgary.

When within 27 miles of their objective they met tragedy, due, it is thought, to the driver being blinded by the oblique rays of the setting sun, which made his way a westerly direction over the crossing.

Farmers Seek Relief

Nearly Million Dollars Damage From Floods In Western Manitoba

Winnipeg.—One hundred and fifty farmers of the Sperling District in Southern Manitoba, claiming to have suffered damage to the extent of nearly a million dollars this season as the result of floods, have directed an appeal to the government for drainage relief.

According to a spokesman for the distressed farmers, approximately 100 miles of land in the flooded district during June and July, destroying grain after it was in the head, and ruined grazing lands.

The government is being urged to reconstruct its drainage system in the affected area. Premier John Bracken and Hon. W. R. Chubb, minister of public works, following a trip of inspection of the flooded lands, promised early consideration of the request.

Fuller Party Reported Safe

Have Been Re-provisioned and Are Now Headed For Shores Of Hudson Bay

Regina, Sask.—Three weeks ago the John D. Fuller expedition of student geologists from Iowa into the north was safely launched on a new and shorter route to Hudson Bay. The four men, who have been almost given up as dead for the past six weeks, have been re-provisioned and given new equipment for the trail. They are now headed along the route through Austin Lakes and smaller bodies of water and down the Thelwaiza River to Hudson Bay. They are expected to emerge near Driftwood Point, halfway between Chesterfield Inlet, their first objective, and Fort Churchill.

Land In Crimea For Jews

Moscow, Russia.—In addition to the land already appropriated for Jewish colonization, the president of the all-Russian executive has granted 100,000 hectares of land (approximately 272,500 acres) in the Crimea for 15,000 Jewish families. The decision was prompted by the success of Jewish farming colonies organized in recent years.

For Open Door Policy

Jan Smuts Wants Larger White Population For South Africa
Cape Town.—A strong plea for a vigorous immigration policy for the Union of South Africa was made by former Premier General Jan Smuts, leader of the opposition, in a speech at Reitz, Orange River Colony.

"South Africa must throw open wide its doors to immigration for the larger white population is the best solution of the 'poor white' problem," he said. "We should open our doors to the United States and Australia also."

"South Africa is often inclined to take big and bold of no further immigration being needed because the country is over-populated," Smuts said. "Just as we laugh at our forefathers so will our descendants laugh at the present absurd restrictions on immigration."

Expedition Well Equipped

Commander Byrd's Antarctic Venture May Cost One Million

New York.—The Antarctic expedition of Commander Richard E. Byrd, which starts from this port this week, will be the most extensive expedition in the history of exploration and may cost one million dollars.

"At the expedition's headquarters here it was said the cost would be not less than \$855,000, and before the expedition returns to this country may reach \$1,000,000."

Contributions received to date include \$355,000 worth of equipment and \$257,043 in cash. The total expense of Commander Byrd's North Pole expedition in 1925 was \$140,000.

Aerial Sham Warfare

Two Accidents Was the Result Of The Manoeuvres Over London

London, Eng.—The aerial sham warfare over London, in which hundreds of planes have been engaged for four days, was marred by the first two accidents of the manoeuvres. No one was hurt.

Flying Officer L. C. Bennett was forced to jump in a parachute when his plane burst into flames over Richmond. He landed safely on a house top. A "radioing" bomber, engaged in an attack on London, was forced landing in a field and was damaged, but the pilot and observer escaped without a scratch.

Successful Expedition

American Expedition To Central Asia Makes Valuable Discoveries
Peking.—Roy Chapman, leader of the fourth central Asiatic expedition, returned to Peking after covering 5,000 miles on what he described as one of the most successful trips ever made.

The chief prize of the expedition is the fossilized skull, teeth and shoulder bones of a prehistoric monster with a saddle-shaped head. "The specimen is of the most colossal animal ever existed," Mr. Andrews said. "It is unknown to science. Only part of its head bones alone weigh more than 600 pounds."

BRITISH STUDENT HARVESTERS

British university students seeking information, experience and adventure help with the harvest in the West this year and places for them are being found by the colonization department of the Canadian National Railways. If they are all of the type of the first four to arrive in the West both Canada and Great Britain should gain by the enterprise. The photograph shows the advance guard of four of these young men. From left to right, with the places where they are being stationed, they are: W. D. Harrison (Marcell, Sask.); E. A. Corcoran (Weld, Sask.); F. W. Beale (Carleton Place, Ont.); and J. D. Preston-Jones (Atwater, Sask.).

Mends Native Sons Of Canada

Dr. J. H. Cotton, of Toronto, was elected president of the National Council of the Native Sons of Canada at their annual meeting in Eastern Canada. Dr. Cotton is the first eastern member of the organization to be appointed to the presidency. Formerly he was appointed to the vice-presidency of the council.

To Take Care Of British Harvesters

Effort Will Be Made To Provide Permanent Work Throughout Winter

Saskatoon, Sask.—If the British men who are coming to the west to work in the harvest fields do not obtain permanent work throughout the winter it will be the fault of the railway companies or want of effort on their part.

No stone will be left unturned to try to keep these men here and in the opinion of T. Devlin, local manager of the Canadian National colonization department, future immigration from the British Isles depends largely on the success or failure of this venture.

Mr. Devlin said that he could see no reason why the project should not prove an outstanding success. "The men who are coming are by no means strangers to hard work, and they know just as much about farm work as the average harvester from Eastern Canada," he says.

Will Be Buried In North

John Hornby and Companions To Be Interred At Spot Where They Perished

Ottawa.—The bodies of John Hornby and his companions, Alford and Christian, will probably be buried at the spot where they perished on the shores of the Thelon River. It is a practical impossibility to bring the bodies back to civilization, particularly at this time of the year, Mount Police officials stated today. During the winter months dog sleds might be used but it is regarded doubtful if even this method would be feasible.

Identification of the explorer and the other members of the party is positive, it is stated. Papers on the bodies assisted in the identification. In order to effect the burial Mount Police officers will have to travel west 200 miles from Chesterfield Inlet.

Preparations Being Made In Paris For Signing Of Kellogg Peace Pact

Receives Re-Appointment

Dr. McLean To Be Assistant Chief Commissioner Of Rail Board

Ottawa.—Dr. Simon J. McLean, Ottawa, has been re-appointed assistant chief commissioner of the board of railway commissioners. Dr. McLean's term of office expired August 6, and his re-appointment is for a further period of ten years. Dr. McLean was originally appointed to the board in 1908.

The term of Commissioner Frank Oliver will terminate toward the end of September, when Mr. Oliver will have reached the age limit of 70 years.

Dr. McLean drafted the Dominion Railway Act, and his re-appointment for a third term creates a precedent. Since the formation of the Board of Railway Commissioners in 1904, Dr. McLean has been the only commissioner to be re-appointed after expiration of the ten-year term.

While no official statement has been made in the matter, it is rumored that legislation may possibly be introduced at the next session of Parliament providing for the superannuation of members of the board.

All Bitterness Forgotten

Remarkable Tolerance Is Shown In Irish Free State

London, E.C.—Right Hon. Hugh Kennedy, chief justice of Ireland and honorary member of American and Canadian Bar Associations, was the guest-speaker at the Canadian Club luncheon here.

"We had a fight with England but that fight terminated in a treaty of peace. If only a reconciliation was reached which I believe has wiped out the rancor which existed in the past, the chief justice said."

One of the first steps in the reorganization of the country was placing agriculture on a firm basis, as agriculture for years to come would continue as the foundation of prosperity in Ireland, he said.

He said that the Free State had shown a remarkable degree of tolerance with the test of religion never entering into politics. As an example, he referred to the fact that the minister of finance was a Presbyterian from an Orange county.

Inspect Australian Ship

12,000 People Visit New Cruiser During Stay At Montreal

Montreal.—H.M.A.S. Australia, flagship of the Royal Australian Navy, sailed for Quebec following a visit of several days to Montreal. It is estimated that 12,000 persons visited the new cruiser while she was here.

The Australia will remain at Quebec four days, following which she will proceed to Halifax, which will be visited on August 22. Other places to be visited include Boston, August 25; New York, August 28; Chesapeake Bay, September 4; Colon, September 11; Tahiti, September 20; Wellington N.Z., October 9; Brisbane, Australia, October 17; Sydney, N.S.W., October 23.

High Parachute Jump

Washington, D.C.—William F. Scott, navy chief machinist's mate, leaped 15,200 feet in a parachute recently, landing unhurt on the roof of a four story apartment block. He climbed down the fire escape. He is seeking to break the world's parachute record of nearly 25,500 feet.

Heads British Delegation To The Parliamentary Association Meet

London, Eng.—It is announced that in view of the appointment of Lord Halshead, lord chancellor, as acting prime minister in the absence of Premier Baldwin, Viscount Peel has been appointed chairman of the United Kingdom's delegation to the meetings of the Empire parliamentary Association in Canada in the next few weeks.

Viscount Peel is first commissioner of works in the government and has held numerous appointments from 1906. He was under secretary of state for war from 1919 to 1924. He is

Paris.—With the signing of the Kellogg outlaying up to the pact may only ten days off, Premier Poincaré has laid his plans for the ceremonies, which will take time ordering his cabinet to Paris for an extraordinary session on Thursday.

The French government does not expect to be caught unprepared for any situation which may arise out of the gathering here of the statesmen of the fifteen nations which will sign the treaty. Continued hints that some of the visiting diplomats plan to lobby their pet troubles and problems in the Quai d'Orsay during the gathering is generally said to be the real reason for Poincaré's sudden summoning of his cabinet.

It is considered here that there are far more important problems which could be raised in the hallways of the Quai d'Orsay than the question of evacuation of the Rhine, and which it has been suggested the German foreign minister, Stresemann, might bring up in his conversations with the other statesmen.

Although it is known that U.S. secretary of State Kellogg does not want to discuss at the meeting except outlaying of war, France does not want to be confronted with some one else's representative informally, without knowing what to do.

There are official intimations that Czechoslovakia will be represented by foreign minister Edward Beneš and that foreign minister August Zolnowski, of Poland, will sign for Poland. The signing of the treaty, of course, will sign for Germany.

President Cosgrave, of the Irish Free State, is said to have decided to go to Paris during the opening of the pact in order to meet Secretary Kellogg and return with Kellogg as far as Dublin on the cruiser Detroit, which will take the American secretary of state back to the United States. It is not yet known whether Cosgrave will sign for his government's official representative.

Praises Pool System

Toronto Professor Says Pool Has Revolutionized Method Of Farming Community

Williamstown, Mass.—Agricultural co-operation is not merely a marketing device but a means of lifting the farmer to a plane of greater prosperity and keeping him there, Prof. C. E. Pay, of the University of Toronto, told the Institute of Politics here.

"In Canada," he said, "the wheat farmer is revolutionizing the methods of the farming community by the farmer of the difficulty of deciding when to sell, eliminating the middleman, and having all farm marketing on statistical knowledge."

Co-operative systems he declared, is of special benefit to the small farmers, whose plane of living has been raised to the highest level by their use.

In the United States the government's attitude toward the farmer's problem is one of encouragement through active assistance in research and educational facilities. C. L. Christensen, chief of the department of co-operative marketing of the department of agriculture, said.

Mine Blast Is Fatal

Calgary.—L. L. Johnson, for years chairman of the Department of Soldiers' Civil Re-establishment at Calgary, was instantly killed when a charge of dynamite exploded prematurely in Mr. Johnson's mine at Delson, Alta., according to information received here.

WORLD HAPPENINGS
BRIEFLY TOLD

Increasing alarm is being expressed over the unemployment situation in Great Britain, with 1,300,000 men out of work.

Two new brands of whisky, approved by the Ontario Liquor Control Board, have been put on the market by the commission. The varieties are styled "Commission No. 1," and "Commission No. 2," and bear the seal of the board's approval on the bottles.

Dr. Paul, chief chemical analyst for the Bureau Generale, the French Sealand Yacht, is reported to have detected toxic matter in the viscera of Captain Alfred Lowenstein, Belgian financier, whose death recently was surrounded with mystery.

Four men held up the First National Bank of Buxton, N.D., and escaped with between \$2,500 and \$4,500. They made their getaway in a dark blue Buick sedan heading east out of Buxton, which is about 65 miles north of Fargo.

Baron Von Huenefeldt, owner of the trans-Atlantic monoplane, the Bremen, which Captain Hermann Kuhl and Col. James Fitzmaurice piloted across the Atlantic, will make a present of the disabled plane to the projected municipal museum of New York.

Investigation of the immediate power requirements of the city of Saskatoon is to be made by a committee of the Saskatchewan Government, with a view to working out a plan under which a start can be made in the production and sale of power under central control.

Owing to inadequate steamship accommodation, it will be impossible to transport to Canada full quota of 10,000 unemployed which were to work in the Western harvest fields, according to J. Bruce Wallace, secretary of the European Immigration for Canada. He states that possibly not more than 8,500 would be taken to Canada from all sources.

Lost Prospector Found

After Walking Aimlessly For 48 Days, Is Rescued By Plane

Lost forty-eight days, during which time he wandered aimlessly through the dense wooded country north of The Pas, Andrew Taylor, local prospector, was found by searchers near Burntwood Lake, and brought by aeroplane to The Pas.

It was a harrowing story that Taylor related to his rescuers. For days he walked through the woods in the belief that he was on his way to settlement, only to find that he was hopelessly lost.

Faced with starvation, he had killed frogs and eaten them, and at times when driven to desperation had relieved his hunger by consuming dead fish found on the surface of the river.

Later, he found a few half formed wild raspberries and then stumbled across a potato plant planted by an Indian. It was the uprooted tubers seen by a wandering native that gave the first authentic clue to his whereabouts.

He must have travelled 200 miles in a huge circle to reach Burntwood Lake.

The condition of the man when found by Fred Coleman, veteran prospector of Cobalt, Ont., and Capt. Kenyon, who piloted the "Joker" search plane, betrayed the extreme hardship and suffering which he had endured during his wanderings. His clothing was in tatters from pressing through dense undergrowth, while bits of rag were bound around his face for protection against the rough freezing.

Seven weeks' growth of beard covered his face, while his haggard countenance showed that he could have survived much longer, but he had not reached him. Barely able to walk, he nevertheless showed his joy in having been returned to his wife and friends who had long since given him up for dead.

"No one lived. Are you cold?" "No, thirsty," Polo Mele, Paris.

W. N. U. 1747

Farmers' Marketing Tour

Canadian National Railways' Tour To Great Britain and Denmark, 1921

(Continued.)

We were (now) in the home of the Clydesdales, and a call by Mr. Weir, from Newcastle, in the morning had brought a pressing invitation from Messrs. A. & N. Templeton, of Sanquhar, to visit them. This took a section of our party to see the great horse "Benefactor" and none of his progeny as well as the Border Leicester flock of Messrs. Templeton and here we had our first taste of Scottish hospitality. The brothers with their sisters and mother entertained us royally to a delightful tea and the "wee drapple" was not missing. Ours was a great privilege because the afternoon was lovely and from the high ground at Sandy Knowe the eye can roam for twenty to thirty miles in every direction over the beautiful Scottish countryside. Our visit over, we continued our journey to Edinburgh, enlivening the night with old familiar songs.

The "main body" had gone on, passing through Dalkeith at dusk, making many memories for one of the members of our party, Mr. James Walker, representing the Canadian Bank of Commerce, Toronto, who was born in this pleasant town. The "wee drapple" was in Edinburgh, comfortably established in the North British Hotel, overlooking the famous Princes Street.

From Melrose we had sent a challenge to meet the best cow-puncher in Scotland, the aspiring rival being a Scotchman of the name of MacLennan, but unfortunately a game could not be secured owing to its being Saturday.

Our first engagement was to visit the Clydesdale at Portlough of Mr. Robert Park, owner among other notable stock of "Brunstane Aggie," "Brunstane Phyllis," and both of which, along with a number of other cattle, were sent to our benefit. To our astonishment all these animals, including the great Aggie, were put through their paces by Mr. Park's twin daughters, girls of sixteen, when, to our delight, horsesmanship delighted us all, as did their own performance. Even the "wee drapple" was put through its paces in "fancy" Clydesdales, but prefers to breed for scale and power, and we listened with respect to his view as he expounded his breeding principles.

Mr. Park took us into his home, Brunstane House, where his daughters entertained us to high tea in the room where the final committee meeting was said to have been held when the Union of Scottish Farmers was decided in 1877. The room is eight-sided and contains a 14th century fireplace. But a few years ago the great sideboard on which were two Caxton's were turned to the left and a sister daughter—Brunstane Aggie—was put in its place.

A trip to the famous Forth Bridge, reminding us so much of our own Quebec Bridge, completed our first day in Edinburgh.

Leaving for Stirling at 8 a.m., en route for Perth, we were treated to a taste of Highland weather, for snow began to fall by the time we reached Stirling Castle. This fortifying evening, however, high on a dominating rock overlooking the plain beneath, is interesting at any time, but seen through a Scottish mist and falling snow, it was doubly fascinating.

Next we walked the courts and trod the battlements. We examined with some wonder the statue of the Douglas, room where the rebellious Earl was stabbed to death by James I., in 1424. We left with the influence of those fiercely stirring times still upon us, to view in front of the castle the noble statue of Robert the Bruce, where, his voice thrummed with pride, a small boy with his sister told us of Scotland's glorious days, exclaiming in this guide to the Castle that:

Next we came to the wonderful Wallace Monument, a great granite tower, four square, 220 feet in height and standing 329 feet above the level of the Forth. In a niche on the west corner stands a bronze statue of Wallace, mounted on a horse, and from his hand he holds a sword 21 feet in length, 50 feet above the doorway—a noble figure, sword on high, summoning his followers. Those of us who climbed the inside spiral staircase of 240 steps were amply rewarded. The four chambers are noted among other things for a wonderful echo and in one of them, the Hall of Heroes, lies the double-edged sword of Wallace, 4 feet 4 inches long in the blade which narrows from 2 1/2 inches to 1 inch. The leather mounted hilt is 12 inches as long and has a two inch pommel. For six centuries Wallace's sword lay in Dunbarton Castle, long transferred to the Monument by Hugh H. Wallace of Glenasmole Castle, his illegitimate descendant.

Snow still falling, we arrived in Perth, the pretty ancient city by the Tay. Perth is not a big city but its charm is infinite. Moreover, its fame as a livestock centre is world wide. For many years it has been the most important centre in Britain for the selling by public auction of pedigree Shorthorn and Aberdeen-Angus cattle, and our arrival coincided with the biggest sale of the year.

Following lunch and a warm welcome by Lord Provost Dempster, we were soon watching with critical eyes the judging and street parade of cattle, noting with admiration the high average of quality prior to taking

RULING INDIAN PRINCES

Conferences are now in progress between representatives of the ruling Indian princes and of the secretary of state for India. At present only about half of India is under direct British rule, while the rest is made up of a hundred so-called independent

states. It is said that the rulers of the native free states seek to create a federation, which would recognize some central authority, which is hoped to be a larger union, which it is hoped would embrace British India as one of its units. The four spokesmen for the reigning princes are: (1) the

Maharajah of Kashmir, who won considerable notoriety as Mr. A. in the Robinson blackmail case; (2) the Maharajah of Patiala; (3) H. H. Sir Jagat Singh, and (4) the Maharajah of Hapur. They are conferring with the eminent counsel, one who had been a leading part in some of the most important cases heard in the Dominion. Known and held in high regard in the prairie provinces, in British Columbia and in the far away Yukon, where he was one of the hardy pioneers who went through the gold rush, C. C. McCull had a wide circle of friends and acquaintances.

From 1883 to 1888, Mr. McCull practiced law at Port Macdonald and then he removed to Leithbridge, where he established a law partnership with F. W. H. Hamilton, who died in 1884, and later became chief justice of the Northwest Territories.

Crush curd in a bowl with a fork. Mixing with a wooden potato masher will break the lumps and give cream a finer texture. Season to taste with sweet or sour cream, butter, salt and pepper. Finely chopped onion, parment water cream, cream, pimento or green pepper may be added.

Make junket according to the directions given on the package. When ready to serve, dust berries with powdered sugar and fill up the glasses. Whipped cream may top the berries. Fruit and berries like oranges, pineapple and strawberries should not be put into the milk when making junket, as the fruit causes it to whey. These fruits should be crushed, extended and placed in a cup as the dessert is served. Blackberries or raspberries may be put into the dessert, also canned or preserved berries, peaches or other fruits.

Goes To Experimental Farm

J. G. Davidson, Of Saskatchewan University Reaches Appointment

Announcement is made of the appointment of J. G. Davidson, B.S.A. (Saskatchewan University, M.S.A. (McGill University), to the position of assistant superintendent of the Dominion Experimental Farm at Indian Head, filling the vacancy created with the advancement of G. D. Matthews to the superintendency at the Scott farm.

Mr. Davidson comes from Kelvington, Sask., where he has been engaged in his university studies. He is a married man and will move his family there shortly.

Man wanted for gardening, also to take care of the farm who can sing in the choir and blow the organ.

Premier Presented With Cottage

Cottage In Saskatchewan's New National Park Is Given To Prince Minister

Not least interesting of the ceremonies attendant on the opening of the National Park in the northern part of Saskatchewan, was the presentation to Premier King of a magnificent log cottage situated on the south side of the lake opposite King's Island and commanding a magnificent view of the lake. The presentation was made by J. G. Davidson, an old timer of Prince Albert and district, in the presence of a large and distinguished gathering.

Premier King, in accepting the gift, indicated that it would be his intention to hold the cabin in trust so that those who might come after him might have a pleasant remembrance of the great hospitality of the north country, the kindness and thoughtfulness of those who joined with Prince Albert in preparing the cottage.

The cottage is unique in that several phases combined in its completion. Prince Albert provided the logs and erected the cottage. Regina equipped the living room, Saskatoon equipped the veranda, Humboldt was responsible for one of the bedrooms and Vonda for the second. Melrose provided the furniture, equipment (up-to-date in every way), and Moose Jaw provided the dining-room equipment.

Recipes For This Week (By Betty Barclay)

HOW TO MAKE COTTAGE CHEESE

Use freshly coagulated or clabbered milk. Skim off cream. Set pan of clabbered milk in hot water and heat slowly until the curd is firm and whey. Be careful not to let milk become too hot or curd will be tough. Place in a strainer a piece of cheese cloth rinsed in hot water strain out curd mixture until well drained.

Crush curd in a bowl with a fork. Mixing with a wooden potato masher will break the lumps and give cream a finer texture. Season to taste with sweet or sour cream, butter, salt and pepper. Finely chopped onion, parment water cream, cream, pimento or green pepper may be added.

RASPBERRY JUNKET WITH FRESH BERRIES

1 package raspberry junket powder. 1 pint milk. Raspberry. Powdered sugar.

Make junket according to the directions given on the package. When ready to serve, dust berries with powdered sugar and fill up the glasses. Whipped cream may top the berries. Fruit and berries like oranges, pineapple and strawberries should not be put into the milk when making junket, as the fruit causes it to whey. These fruits should be crushed, extended and placed in a cup as the dessert is served. Blackberries or raspberries may be put into the dessert, also canned or preserved berries, peaches or other fruits.

Duck shooting season opens
Saturday, September 15.

Mrs. S. G. Clarkson is visit-
ing in town this week at the
home of Mrs. G. Durk.

Mrs. V. Hanna, and daughter,
Greta, made a trip to Cal-
gary, last week.

Bill Howies, jr., left on Mon-
day for Montreal, to take up
his professorship duties at St.
Anne's college, there.

Do not miss this week's
showing of "What Price Glory."
The world's greatest motion
picture.

Mr. and Mrs. Paul Dolg and
family are expecting to take up
their residence in the house at
present occupied by Mr. and
Mrs. Don MacRae.

Mr. and Mrs. Verne French
are reported to have acquired
the M. A. Blodgett residence,
and with their family will oc-
cupy it this winter.

Our Best Meet at Night
CALGARY, ALTA., Canada

Regular meeting of the
W.M.S. will be held next Wed-
nesday, September 19, at 3 p.m.,
at the home of Mrs. A. R.
Frost. All members are urged
to be present and visitors are
welcome.

R. Roadhouse, of Sceptre
was a visitor in town, Sunday.
A. Hauk accompanied him on
a trip to Calgary. Much of
the grain is still standing in the
Calgary area and undoubtedly
a large portion of it is frosted.

Rev. and Mrs. Geo. A. Shields,
attended a meeting of the
Medicine Hat Presbytery on
Tuesday, making the trip there
and back in one day.

Mrs. McAmmond addressed
a meeting on Tuesday evening
in the United Church school
room in the interests of the
W.C.T.U. There were a very
small number present.

Mrs. McTherson and daughter,
and son, Stewart, returned
on Monday, from Elbow, Sask.,
where they have been spending
a holiday. They made the trip
by auto and report a pleasant
time.

Mr. and Mrs. T. S. Wallace
Wednesday morning, left for
Wayne, Alta., where they will
make their home. Constable
Wallace has been transferred
there in connection with his
duties as a member of the Al-
berta Provincial Police force.
Citizens generally very much
regret their departure as they
have made themselves very
popular during their lengthy
residence here.

are expecting to move into the
house at present occupied by
W. R. Brodie.

A Scourge of Children

During the months from
May to November there is a
"terror that walks by night,"
a whisper of whose presence
makes parents tremble. This
ghost is still standing in the
Calgary area and undoubtedly
a large portion of it is frosted.
Infantile Paralysis is a germ
disease. It occurs most often
in the months May to Novem-
ber, and most often among
children, though adults are not
yet immune. The disease
affects all races, all
ages, and all parts
of the world, but is more pre-

valent in colder climates. The
robust child falls a victim as
readily as the delicate child.
During an epidemic, rural
communities suffer more than
cities.

Infantile Paralysis is its be-
gining resembles many other
contagious diseases. A child
that has been perfectly well
will become restless and drowsy.
He is irritable, and does not
want to be moved. There may
be vomiting or diarrhoea, but
constipation is the rule. There
may be headache pains in the
muscles, or a convulsion. The
child is feverish. That may be
all that appears, and yet within
one or two days, the child may
be unable to move arms or
legs.
If a child appears to have

fever, vomiting and marked
restlessness, put him to bed,
and call a doctor promptly.
"No matter how mild the sick-
ness may seem, get a doctor."
While waiting, give a dose of
Castor Oil. Keep all other
children away.

If there is an epidemic, keep
your children away from
crowds, from movies, theatres,
races, etc. Keep them from
homes where there is sickness.
Keep the house clean, using
plenty of soap and water. Burn
rubbish. Garbage buckets should
be tightly covered, and

cleaned daily. Keep out flies
and other insects. Let in fresh
air and sunlight — they are Na-
ture's killer of germs.
Further information may be
had from the Canadian Red
Cross Society, 407 Civic Block,
Edmonton, Alta.

Mr. and Mrs. N. Bessarab,
and children, returned this
week from holidays at Banff
and other points.

Bob Simmons has rejoined
the local C.P.R. roundhouse
staff.

Circle the Globe

1. The Fairchild cabin monoplane "City of New York" with her wings folded at Curtis Field, N.Y., prior to being
loaded on a trans-Atlantic liner. 2. John H. Moore and Capt. C. B. Collier, his pilot, who carried Moore and
Collier across the Pacific with their plane "The City of New York" aboard. She was used by Moore in 1914 when
he made his first world record.
Twice now, John Henry Moore
has circled the world in record
time. On each occasion the Can-
adian Pacific liner "Empress of
Russia" has enabled him to beat
all former records. Twenty-three
days before his plane "The City
of New York" landed at Curtis Field,
L.I. Moore and his pilot, B. D.
Collier, flew 750 miles out to sea
and landed aboard the ship that
conveyed him to France. Arriv-
ed in Europe, he flew from Cher-
bourg to Yokohama and boarded
the "Empress of Russia" at Kobe,
where the white liner waited
ready to dash across the Pacific
to Vancouver. From Vancouver
to New York was covered by
Moore's monoplane, which he car-
ried with him on board. In his
first article Moore prophesied suc-
cess for himself and his compan-
ion because "the Canadian Pacific
liner "Empress of Russia" brought
me luck when I broke the record
in 1913 and I look on it as a good
omen that she is to help me break
the record again."
He succeeded in breaking the
record even better than expected.
The "Empress of Russia" bringing
him in a day ahead of schedule,
enabling him to hop across the
